Art Unit: 1761

Upon further review, the restriction requirement of November 4, 2002 is withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Han et al in view of Monti et al.

Han et al disclose a method of producing cheese comprising adding a milk whey protein product (at least about 5%) to the material milk, adding transglutaminase, and then subjecting to additional cheese processing steps, where the whey protein product is added (see entire patent).

The claim differs as to the use of a decomposing enzyme.

Monti et al disclose the conventional use of trypsin to increase the solubility of whey protein (see abstract).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use trypsin as taught by Monti et al in that of Han et al because the use of trypsin serves to increase the solubility of whey protein and consequently makes it easier to incorporate into a cheese product.

In the absence of a showing to the contrary, the limitations as to times and temperature are seen as no more than storage conditions.

Art Unit: 1761

In the absence of unexpected results, it is not seen how the claimed invention differs from the teachings of the prior art. Applicant's claims are drawn to a combination of known components which produces expected results, see *In re Kerkhoven* 205 USPQ 1069 and *In re Gershon* 152 USPQ 602.

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

All of the claim limitations and arguments have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rhodes discloses a method for making an enhanced cheese product comprising adding a whey protein to the cheese process (see entire patent, especially the Examples).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
